

ADIPOCYTE COMPLEMENT RELATED PROTEIN HOMOLOG ZACRP2

ABSTRACT OF THE DISCLOSURE

5 The present invention relates to polynucleotide and
polypeptide molecules for zacrp2, a novel member of the family
of proteins bearing a collagen-like domain and a C1q domain.
The polypeptides and polynucleotides encoding them, are
involved in dimerization or oligomerization and may be used in
10 the study thereof. The present invention also includes
antibodies to the zacrp2 polypeptides.
